

Looking beyond the business

Saga 360: Looking beyond the business

Saga Consultoria is always focused on transforming our society in a fairer place, with opportunities, quality education and access to health for all. We believe that each one, in his own way and within his possibilities, has a great power in their hands: make the world a better place to live. Following it, we fight daily, not only executing excellent services in engineering, but also keeping our social conscience and contributing with improvements for our city, our country and for the world around us.

We know that the current humanity challenges are huge: hungry, poverty, wars, climate change, inequality at very high levels. The internal challenges in Brazil are also of similar magnitude. But we believe that the only way to face them is through the union of people, companies and government across impacting transforming actions that allow effective social and sustainable improvements.

The program Saga 360 was created in 2016 and has as main objective the financial contribution and divulgation of charity institutions. The program target is to help non-profit organizations to achieve its social missions changing the society around us. This assistance goes beyond of financial donations, but also includes monitoring and participation on the chosen institution actions.

The operation of the program is: every semester an institution is chosen by Saga contributors considering the following criteria:

- Recognition of actions and provided services;
- Relevance of the field that the institution proposes to act;
- Efficiency in the actions performed by the institution;
- Institution needs of resources;
- Transparency and trust of financial management.

After choosing the semester partner institution, Saga makes an initial donation, variable with the institution size. Then, a new donation of 1% of the signed contract is made for each Project started by Saga. In addition to that, Saga assists in the dissemination of acts and results obtained by the institution, thereby creating a solidarity chain between the company, employees, suppliers and customers.

Join us and let's help to make difference to hundreds of needy people. You can get more information about the institution in the section below and contribute also with the Program. We are committed to provide the follow-up of the chosen institution actions, as well reliable information about the use of the donated resources. We will be proud to have you as our partner in this solidarity chain.

After several suggestions and Saga's analysis, we chose "Fundação Abrinq" to participate of Saga 360 in this phase. Check below a little bit more about this chosen institution.

If you have any questions or would like to suggest a charity institution for the next phases of the program, please contact us in the e-mail: saga360@sagaconsultoria.eng.br.

We also would like to know critiques and suggestions about the program so do not hesitate in contact us and let your message.

ABRINQ Foundation

Aware that the responsibility of children and adolescents in our country, belong to all the society and not only to the public authorities, a group of toys entrepreneurs get together in the late 1980 to inaugurate a social responsible companies concept.

In this context, in 1989, the Brazilian Association of Toy Manufacturers (Abrinq) created inside its structure, a directory for the defense of children rights which was the nucleus of the future Abrinq Foundation for the children and adolescents rights, which was officially founded in 1990. Today they act as a non-profit organization that has as mission to promote the rights defense and the citizenship exercise of children and adolescents.

Based on the International Convention of the Children Rights (UN, 1989), the Brazilian Federal Constitution (1988) and the Child and Adolescent Statute (1990), the strategies foundation are: stimulus and pressure to implement public actions, fortification of governmental and non-governmental organizations to provide services and rights defense, stimulate social responsibility, political and social articulation in the building and rights defense and knowledge about the Brazilian reality regarding the children and adolescents rights.

The organization office is in São Paulo (SP-Brazil) and the program is organized in three axes: education, protection and health.

Mission

To promote the rights defense and the citizenship exercise of children and adolescents.

Vision

A fair society which is responsible for the protection and full development of its children and adolescents.

Values

Ethics, transparency, solidarity, diversity, autonomy and Independence.
